## A NEW WAY FOR CME WITH CHILDREN'S HEALTH<sup>SM</sup> PHYSICIAN SERVICES

### THE NEED

Continuing Medical Education (CME) is a challenge for any practice, large or small. Meeting requirements often means expensive conferences; time consuming Grand Rounds or online subscriptions on platforms that are outdated and not user-friendly. As part of our management solutions suite, Physician Services has developed a new way to look at CME—so you spend more time applying those lessons learned for the benefit of patients. Through our research, we heard these specific needs from independent practices like yours.

### Value: Cost Savings and Time Efficiency

The Physician Services CME program provides a single source for education that eliminates the various virtual and physical venues that consume your practice's financial and time resources.

### Smart and Timely: Beyond Requirements

- The Physician Services CME program provides updated information to assist you in treating your patients and determining when referral to a specialist is appropriate.
- "Children's Live" will allow online access to digital content, live medical discussions, case study sharing and other comprehensive sources to share knowledge.

### User Friendly

- The Physician Services CME program utilizes a variety of online formats to facilitate your learning, from streaming video to education modules.
- The Physician Services CME program enables interaction with experts and other providers in a variety of engaging formats.

### Robust

- The Physician Services CME program includes continuing education for you, other clinicians in your practice and your office associates.
- The Physician Services CME program is a constantly evolving platform seeking and implementing the best of online medical education innovation.

### Utilizing Continuing Medical Education with Physician Services

Physician Services can consult with you and help identify areas of our CME program to demonstrate how it might help your practice. Contact us for a complimentary demonstration.
